Subscriptions may be managed by the user and auto-renewal may be turned off by going to the user's iTunes Account Settings. Any unused portion of a free trial period will be forfeited when the user purchases a subscription.GuitarTuna is developed by Yousician. Check out Yousician's apps to learn and master guitar, ukulele, bass, piano or singing!It's pretty cool you actually read this far! Here's a joke for you: What's the difference between a bass and a tuna? You can tuna bass, but you can't bass a tuna!Now download the app and see how it is.Send us your feedback on the joke and the app to support@guitartuna.com! /yousician.com/terms-of-service Sep 26, 2022 Version 7.16.0 Bug fixes and improvements. I downloaded this app thinking it was just a standard guitar tuner. I used it for about 6 months just as a tuner. I needed to tune a 12 string acoustic for my dad and didn't have a 12 string tuner. I did a little exploring in this app and low and behold I found it actually has a setting just for 12 strings! It cut the time of tuning from ear to doing it off the app from 10 minutes + by ear to barely any time with using the app. So as I realized I hadn't takin advantage of the app as much as I should I started exploring even more. It's a gold mine of knowledge. Not only is it a tuner (best app tuner I've used personally) but it also has a metronome , games , chords, a plethora of instruments to choose from and it's SUPER easy to navigate. I got my dad an iPhone (first iPhone he's 65) and he always complained about how it was hard to use. I showed him the GuitarTuna app and he hasn't ever had any confusion with how to use it. I think that says a lot of how instinctive the user interface is if my dad can do it :P all in all I can't recommend this app enough. I literally tell all my guitar player friends to try it and not one has said anything negative about it. I love it! I can't imagine how the developers can make it better than it already is but something tells me they will! Thanks for making an awesome app. From one musician to another, THANKS!!! Cheers!-Brad. I've never personally tuned a guitar,- I've always had to have someone tune it for me when I briefly owned several guitars many years ago. At the time, I had bought them for my (now) ex husband so he was the one who always tuned them. But unfortunately, when I eventually left him- He got rid of them all instead of giving them to me since I paid for all of them. So needless to say, I've never really had the chance to learn how to play much at all. Recently, I was given another guitar from my sister, & knew I needed to learn how to tune it so I downloaded this app. I find it extremely easy to use & very helpful. Now I can tune my guitar (& maybe???) FINALLY learn how to play like I've always wanted too! I LOVE Music & have to listen to it daily, it's my "Escape" from the world, my life, & all the problems or stresses that I might face daily. I've always wanted to learn how to play for as long as I can remember, so that I could eventually learn to play (at least some???) of the songs I love to listen to everyday or maybe even some that I grew up listening to as a kid. I'm thankful for this app so I can begin my journey towards reaching my goal/dream of learning how to play guitar & music. Thank you for making this app so very easy!!! I Love It!! I've never used the extra features but from what I've seen they seem to work really well though I don't pay the subscription for any of the extra stuff. They don't bar any of the base functions behind a pay wall instead they have extra completely optional features that you can pay to get and they still take good care of the base app. It's really useful for someone who just needs to tune their guitar really quick and is a lot less tedious than carrying around a tuner. Not to mention a physical tuner provides no more benefits than this app. I recommend all guitar players have this in their back pocket. The only thing it can't do with the base app that I don't like is that it can't tune the strings in notes other than standard tuning. Though even so considering it's free it's still a really good tool to have considering the convenience it offers since you'll have your phone on you most of the time anyway.
